We Welcome Your Family and Friends Too!

Our extensive dental training and experience allows us to understand and provide a wide range of smile solutions. We believe in creating the smile our patients are looking for using progressive dental techniques and technology.

Thank you for your confidence in our services, and for sending your friends, family and colleagues our way!

The staff of **Dentistry@Palace Road** look forward to hearing from you and meeting you personally.

Our Services Include:

- **Dentures**
- **Dental Implants**
- **Braces for Adults**
- **Digital X-rays—Less Radiation**
- **Preventive and Cosmetic Care**
- **Oral Sedation for Dental Phobia**
- **VELscope® Oral Cancer Screening**

Dental Implants Complete Your Smile

If you're missing one or more teeth and would like to fill the gap with the most natural-looking, comfortable solution possible, you'll be interested in hearing about dental implants.

If you have healthy gums and bones but are missing one or more teeth and are looking for a natural-looking replacement, or if you currently wear dentures that are uncomfortable or don't fit as securely as you would like, please come in and ask us to explain all of the tooth replacement options available to you. We think you'll be amazed at how modern technology now allows you to have a natural looking, natural-feeling replacement tooth or teeth.

NEW PATIENTS WELCOME!

Wake Up To A Beautiful New Smile!

If you're one of the millions of people who have been avoiding regular dental visits due to extreme anxiety about an anticipated dental procedure, we have some great news for you. Our office is offering **oral sedation**. Even though you are not technically asleep during your dental visit, patients describe the experience as seeming to be asleep, which means that they don't feel or remember the dental procedures, and also have no recollection of the sounds or smells of the dental office, both of which are top triggers for dental fear.

Imagine this... your dentist advises you that you need a filling, crown, root canal or other surgery. You're feeling apprehensive, so, after a careful medical screening procedure to ensure that you are a good candidate for **oral sedation**, your appointment is booked and the smile of your dreams is achieved in one to two visits.

The beauty of **oral sedation** anesthesia is it allows you to be in a comfortable sleep-like state throughout your dental procedure.

Oral sedation is ideal for patients who are fearful of the dentist or who experience dental anxiety, and also for special needs patients who may have trouble sitting still for an extended period of time. It is a good option for people who may need to have a number of dental procedures done, who simply can't keep coming back for multiple appointments and so just want to have all the work done at once. The sedation works for two to eight hours, depending on the amount of dental work you need.

We encourage you to ask us about **oral sedation** and how it can help take the anxiety out of your next dental visit.

LOOSE DENTURES!!

Are you tired of wearing loose or ill-fitting dentures? We have the solution!!

Dental Implants - Serve as an artificial tooth root on which dentures can fit easily. The bond between the implant and the denture serves as a tight fitting system that will allow you to speak and eat with confidence. You will be amazed to see what difference implants can make. Please ask us to show you how Dental Implants work and if they are the best solution for your loose or ill fitting dentures.
